\* For gallery height only, subtract 10mm from these standard heights.

  For Powerlouvre<sup>®</sup> Standard heights

This chart indicates standard window heights corresponding to the number of full blades used in standard Breezway Louvre Window frames. For window heights differing from our standard dimensions, a fixed blade can be added to accommodate the difference.

Galleries/Strip Hardware can be fitted to a number of different window fabricator's frames, please contact your fabricator for their standard window heights.

The Easyscreen<sup>®</sup> Window System with Sub Framing is available for installation and use in commercial projects. For more information please contact Breezway.
